EXPLORATORY TEST REPORT	
Author: Natalia Piska	**Document version [unique ID]:** ST2
	Date [created or last modified]: 17.04.2023r

App. Name and link:
https://testujpl.gitlab.io/pomodoro-kanban-test/

Test environment [description]:
Windows 11 Home,
przeglądarka: Google Chrome Wersja 112.0.5615.121

Session duration:
90 minutes

Time to prepare the environment and design tests: 10 min	**Testing time:** 90min	**Reporting time:** 15min

The idea of exploration [what will be tested]:
- adding, editing and deleting tasks
- changing the order of tasks in the TODO column
- moving tasks in columns using the drag&drop method
- whether the clock starts automatically after moving the task from the TODO column to the INPROGRESS column
- whether the "Clear All" button clears all tasks from the DONE column

Percentage of idea implementation [test completeness achieved]: 100%

Defects:	Issues [ambiguities, doubts]:
ST21: Tasks cannot be edited in any of the columns. After adding anything to the task and saving, the content is automatically deleted. Attached: filmST21	Should the clock automatically stop when we drag a task from the INPROGRESS column to the DONE column?
ST22: The "Clear All" button clears all tasks from the entire table, and its task was to clear only the DONE column. Attached: filmST22	Are the colors orange and green assigned to specific timers (break, task)?
	What order should the tasks in the TODO column be in when adding new tasks?
